

GARDEN GATE TOWNHOMES

## GARDEN GATE TOWNHOMES

---

### Project Location:

South Salt Lake City, Utah

### Project Description:

Garden Gate Townhomes is located in the City of South Salt Lake on the former site of two homes and a four-plex apartment building. This project contains eight townhomes and one single family residence lot. Wilding Engineering, Inc. prepared a property survey, a subdivision plat, and utility drawings and designed the driveway into this 1.0 acre site.

Wilding Engineering, Inc. worked closely with the client, Kruckenberg Construction, to mesh their site plan to our survey and design drawings. Throughout the review process all necessary changes were made in tandem so that the approval could be obtained. The approval process went smoothly with a minimum of redlines from the city.
