ENGINEERING

UCI PRODUCTION WAREHOUSE

## UCI PRODUCTION WAREHOUSE

---

### Project Location:

Draper, Utah

### Project Description:

Utah Correctional Industries wanted to expand their operations with a new warehouse to be located outside of the secure area to simplify delivery of raw materials and finished products for their operation. Wilding Engineering, Inc. was hired by the Division of Facilities Construction and Management to provide site designs and project management.

For the duration of the project Wilding Engineering, Inc. coordinated the efforts of the architect, mechanical and electrical engineers and the general contractor to deliver a product to the satisfaction of Utah Correctional Industries and the State of Utah. Work included: geotechnical investigation, surveying, site plan, utility design, construction staking, and material testing.
