

CHINESE PEAK COMM TOWER

CHINESE PEAK COMM TOWER

Project Location:

Chinese Peak, outside Pocatello, Idaho

Project Description:

Time of Project: May 2009 – November 2009

- Performed Civil Inspections for the construction of a new Communication Tower located on Chinese Peak just outside of Pocatello, Idaho
- Work included creating a pad for the tower and control building, as well as a keystone retaining wall that was constructed on three of the four sides of the pad
- Required daily inspection of wall construction, material compaction, excavation, concrete placement and finish, field concrete testing, and backfill
- Wilding Engineering soils lab generated all gradations, proctors, and atterberg limits for the excavation and material placement as well as compressive concrete strength testing for all concrete
